TABLEAU | SQL | EXCEL | PYTHON | POWER BI | MICROSOFT OFFICE | DATA ANALYTICS | R
TROUBLESHOOTING | PRESENTATION | DATA SECURITY | STATISTICAL METHODS

Work Experience

Junior Data Analyst

Jul 2023 - Apr 2024

NIHR Bioresource | Cambridge

- Led automated report creation using Power BI, enhancing real-time decision-making and analysis efficiency by reducing report generation and data acquisition time by 75% and 20% respectively.
- Worked with Python and Excel to ensure data quality through rigorous cleaning and validation tasks.
- Collaborated with my team in leveraging strong research skills to define data requirements and streamline data collection procedures.
- Assisted in implementing statistical models for accurate trend analysis and forecasting, resulting in a 15% increase in sales forecast accuracy.
- Assisted in collecting, organizing, and analysing large datasets related to biomedical research projects.
- Automated flat table extraction from unstructured text files using NLP and AI, resulting in increased productivity and accuracy.

Data Scientist Intern

Jul 2023 - Aug 2023

Health Data Research UK (HDR UK) | London

- Utilized Python and Excel to conduct data analysis to get results swiftly.
- Collaborated with a varied team to assess and clean complicated data, resulting in improved forecast accuracy for accident and emergency patients.
- Developed and executed machine learning models to analyse extensive datasets.

Education

Teesside University

Sept 2022 - May 2024

Master of Science | Artificial Intelligence with Data Analytics

Ambrose Alli University

Dec 2016 - Dec 2021

Bachelor of Science | Computer Science

Volunteering

Rewriting The Code (Ambassador)

Aug 2023 – Present

- My responsibilities include assisting with event organisation, communicating with community members, and campaigning for gender equality in technology.
