McColl's Retail Group - United Kingdom

June 2018 to August 2018

- Serving people on the tills
- Cleaning the store
- Stocking shelves

Childminding Apprenticeship

Childminder - Leyland

January 2015 to July 2015

Whilst In my apprenticeship my roles included:

- Preparing the children's snacks and lunches - Including items such as; mixed fruit, apples, chopped grapes, strawberries or a slice of toast with either jam or butter. Lunches included cooked meals like pasta and cottage pies and cold lunches including sandwiches with fruit and a yoghurt.

- Planning and preparing Activities for the children to do throughout the day which I would carry out with the children. I planned activities for following week, writing what arts and crafts materials I would need and the method of the activity which I would give it to my Manager.
- Playing with the children whilst also helping them learn - When interacting and playing with the Children I would encourage learning activities with them, extending their thinking and mobility.
- Cleaning up the toys at the end of the day - Once the children had been picked up I ensure the room was cleaned and organised ready for the following day.
- Taking and collecting the older children from school - In a morning I would help in organising the children to get ready for walking to school. Following H&S I would ensure younger children were safe in a pram and the older children were encouraged to hold hands. I would supervisor the children walking there and back from school twice a day.
- Talking to parents - When the parents came to pick up their child I would explain to them what their child had done throughout the day. I would give details on what they played with, if they learnt any new words or actions, their sleep and eating patterns.
- Going to playgroups 3 times a week - We used to take the children to different playgroups such as tummy time, messy play and time out at local community center's in Leyland. I would help in organising the children to get ready for the outings, ensuring other items like nappies and bottles are prepared and ready. I encouraged the children to play, complete the activities and interact with other children. I also used this time to interact with other parents.
