My name is Stephanie Hardie and I am a 21 year-old aspiring graphic designer; I have finished my foundation course at Leeds City University in graphic design and illustration and I am eager to start my career off in the right direction. I know that I have lots to learn and I can not express how excited I truly am for my next steps I have always wanted to go into design and since COVID hit us in 2020 I have gone digital working on my skills and knowledge of both illustration and also the aspects of marketing. I have always been an aspiring artist since I was young I have mastered many different types of art throughout my personal and educational journeys.

I have many different passions outside of design including my tropical fish collection which I am currently in the making of turning into a small business selling fish-themed and inspired prints, I am a very active person I enjoy walking and roller skating.

I would say that my strengths are, my ability to organize and make lists and prioritise my time I am a very organized individual always thinking ahead. I love to work both independently and as a team, I find myself always looking for ways to keep on my toes I love a challenge and I pride myself in my attention to detail. Contamination is important especially when working with clients I have excellent communication skills following my many years working in customer-facing roles.
