### Profession Summary

A systematic and innovative Data Analyst with extensive experience in Data management, research, Data presentation, quantitative and qualitative analysis. Skilled in provision of statistical methodology, strategic insight in the interpretation of Data, analysis of results and production of detailed reports. Experienced in highlighting areas of concern to the management team for proactive measures to be executed. Proficiency in MS Excel, PowerPoint, Microsoft office, R statistics, SQL, and Power BI to improve and monitor data from multiple data sources. Effective communicator with senior management to improve clean data collection and other data related strategies with a successful track record in the adoption of data visualization tools to optimize data interpretation and presentation.

### Key Achievements

**Proficient Data Handling Skills:** Utilizing tools such as Microsoft Excel, SPSS, R statistics, Tableau and Power BI in data collection, cleaning, analysis, interpretation, and visualization.

**Effective communication of Insight:** Presenting data driven recommendation and visualization using dashboards in clear and compelling manner for crucial decision making within the organization.

**Problem Solving and Critical Thinking:** Utilizing statistical methods and critical thinking skills to extract meaningful insights in contributing to the overall success of data driven initiatives.

**Continuous Learning and Skill Development:** Staying updated with the latest industry trends, technologies, and analytical techniques such as machine learning, artificial intelligence, and advanced statistical modeling for professional growth.

**Impactful Business Contributions:** Optimizing processes, improving decision-making, and uncovering new opportunities for growth using data analysis on organizational success.

### Area of Expertise

- Statistical Analysis
- Data Analysis
- Data Querying
- Data Cleaning
- Data Interpretation and Presentation.
- Data collection
- Data mining
- Data Visualization

### Technical skills

- Ms. Excel – Power Query, Pivot Table, Interactive Dashboard
- Power BI - Interactive Dashboard, Power Query and Publishing.
- Microsoft Office – Microsoft word and Microsoft PowerPoint.
- R Statistics
- Tableau.
- SQL.

### Work experience.
