An enthusiast I.T Administrator with over 3 years industrial experience in computer networking and software support using network monitoring tools such as PRTG,RMON and Aspera SmartTrack. Skilled in installing, configuring, upgrading, and maintaining a variety of operating systems such as Windows, Mac OS, and Linux among other system. I'm seeking opportunities to further develop my IT administrator skills and apply my adept knowledge on computer networking, IP subnetting and OSI model to achieving organizational target and goals. I'm devoted to identifying novel fixes for a range of IT issues, including security, database administration, and technical troubleshooting. I can provide your business with first-rate assistance with network administration, successful project management, and improved system performance.

Skills

- C++ and Python language
- Experience with Packet Tracer for Cisco Network Topology
- Network Monitoring Tools (PRTG)
- Networking and routing protocol expertise
- Excellent Command of Microsoft Word, Excel and Power Point
