SUMMARY

- Dynamic Power BI Developer with 5 years of rich experience in IT service firms and devoted to offering expertise in Business Intelligence Technologies, data visualizations, data analysis, and cloud deployment.
- Technically adept with a comprehensive toolset within the Power BI environment as well as data integration, report/dashboard design, and data modelling.
- Actively participated in Agile ceremonies code reviews and collaborated across functions, highlighting impeccable communication and collaborative skills.

WORK EXPERIENCE

Scottish & Southern Energy (SSE PLC), Cardiff, Wales United Kingdom
| August 2023– Present
Power BI Developer

@ Scottish & Southern Energy (SSE PLC) Cardiff, Wales, United Kingdom

As Power BI Developer

- Participated in the production of interactive dashboards and data extraction for end to-end Power BI solutions.
- Created and managed complex data models to ensure insights dependability and correctness.
- Performed complex transformations and computations using sophisticated DAX and M functions.
- Protected sensitive data by putting strict data governance and security procedures in place.
- Utilised Azure Databricks for analytics ETL, and sophisticated data processing.
- Worked in combination with data engineers to guarantee the dependability and quality of the data.
- Created data pipelines and workflows for automated data processing.
- Worked on Azure DevOps Board to monitor the health of the projects.

Bluefield Technologies Pvt Ltd, India
| August 2018 – February 2023
Power BI & SQL Server Developer

@ Bluefield Technologies Pvt Ltd, India

As Power BI & SQL Server Developer

- Worked on cleaning and transforming data using Power Query.
- Developed ETL (Extract, Transform, Load) Packages, with a focus on data cleansing, system integration, and seamless data migration, contributing to the reliability of data-driven decision-making.
- Created calculated columns and measures within the Power BI Desktop environment, facilitating effective data analysis and reporting solutions.
- Collaborated with cross-functional teams to understand business requirements and translated them into effective data visualizations.
- Assisted with the creation of the database, including the table structure and relationships.
- Proficient in database creation encompassing DDL (Data Definition Language), DML (Data Manipulation Language), DCL (Data Control Language), and adept in database and SQL tuning, meticulously planning for performance optimization.
- Developed and maintained complex SQL queries, stored procedures, and ETL processes to extract, transform, and load data from various sources into SQL Server databases.
- Extensively collaborated with the data analysis team to fulfil reporting requirements.

SKILL SET

| Power BI Desktop and Service | Data Modelling | Data Visualization | ETL Process | DAX (Data Analysis Expression) | SQL Server| Excel | Azure Databricks | Azure DevOps | Data Pipelines | Data Processing | Data Engineering | Data Transformation | Data Warehouse | Cloud Technologies | Software Development Lifecycle | Agile Methodologies | Business intelligence strategy | Data Governance | Project management and team leadership |

CERTIFICATIONS

❑ PL-300 Microsoft Power BI Data Analyst

EDUCATION

❑ Bachelor's in computers from Avanthi Degree & P.G College (Osmania University), Hyderabad, India | 2012 – 2015
